COVID-19 Visitor Screening Solution

AYOH

DISRUPT THE STATUS QUO
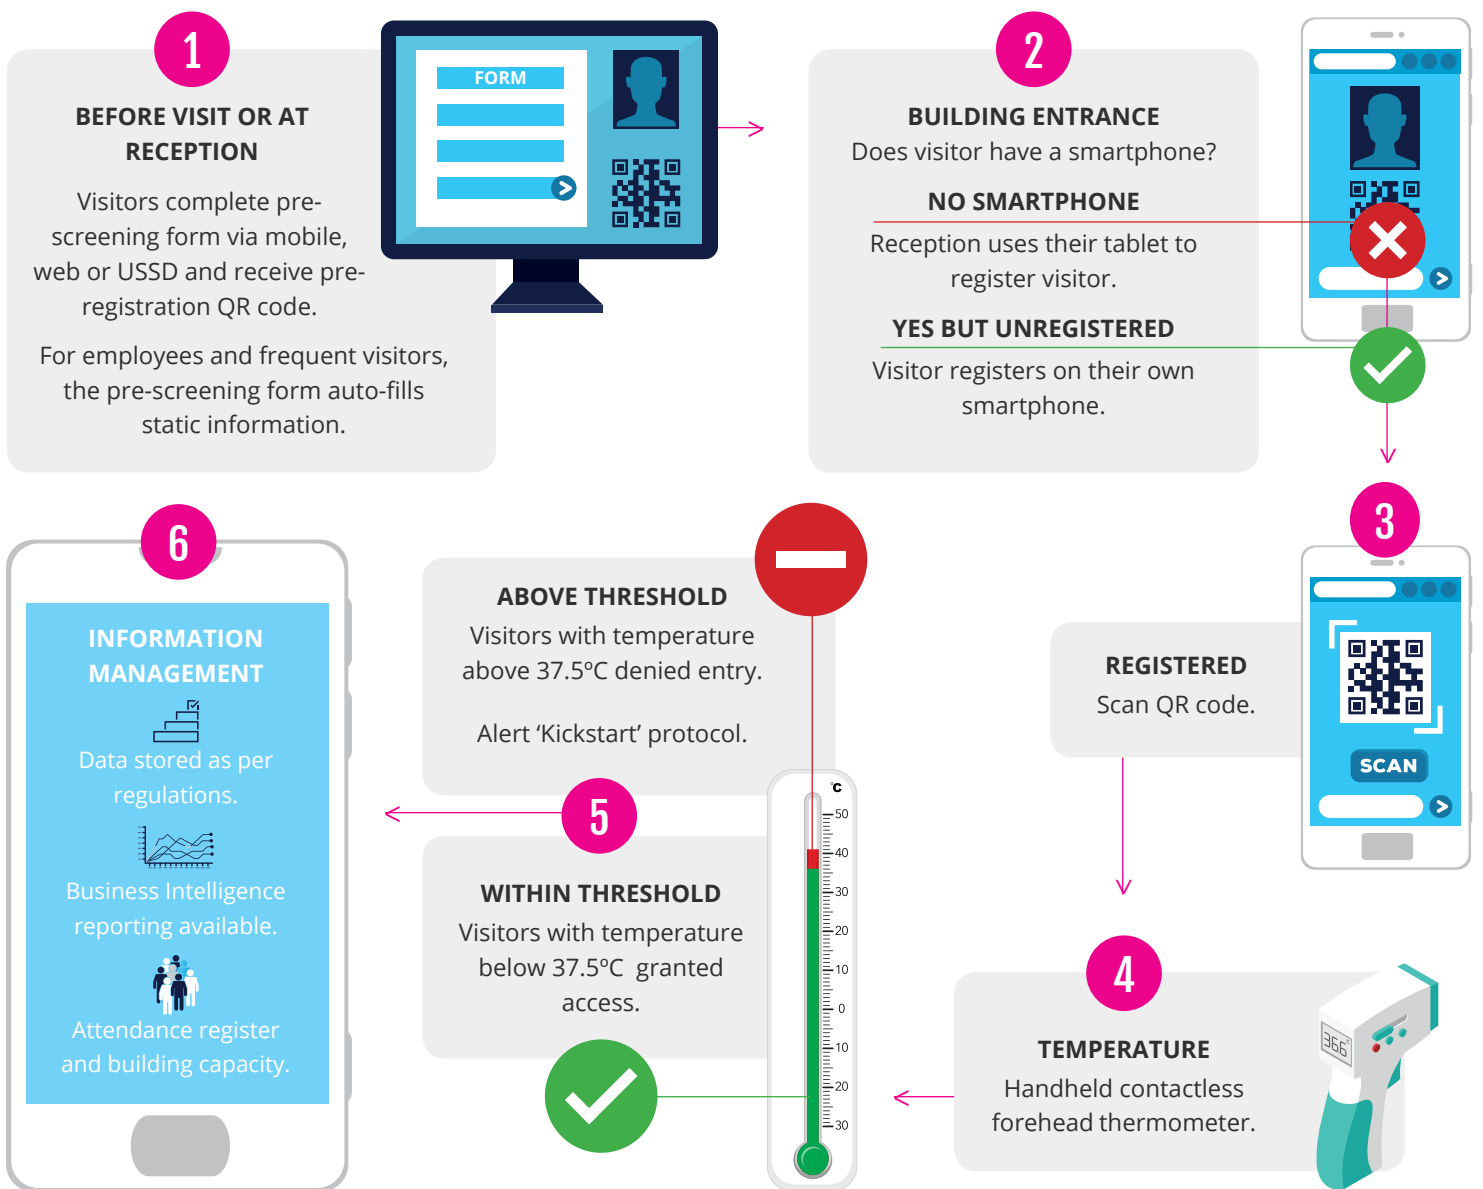

Government regulations for COVID-19 safety measures includes visitor screening by way of a symptom questionnaire and temperature monitoring. Any business or educational institution failing to comply, risks being shut down or fined. AYOH has developed a comprehensive COVID-19 visitor screening solution that complies with regulations and is easy to set up and use.

Comprehensive COVID-19 screening process

Using a combination of thermal screening tools, mobile devices and customised software, AYOH can provide you with a comprehensive screening solution to reduce the risk of spreading the COVID-19 virus, protect your staff, customers and visitors, and meet your compliance requirements. This is how the process works.

1

FORM

BEFORE VISIT OR AT RECEPTION

Visitors complete pre-screening form via mobile, web or USSD and receive pre-registration QR code.

For employees and frequent visitors, the pre-screening form auto-fills static information.

2

BUILDING ENTRANCE
Does visitor have a smartphone?

NO SMARTPHONE
Reception uses their tablet to register visitor.

YES BUT UNREGISTERED
Visitor registers on their own smartphone.

3

REGISTERED
Scan QR code.

SCAN

4

TEMPERATURE
Handheld contactless forehead thermometer.

5

ABOVE THRESHOLD
Visitors with temperature above 37.5°C denied entry.

Alert 'Kickstart' protocol.
